

```

1 integer a
2 integer b
3 integer count
4 float result
5
6 for count = 1; count <= 3; count = count + 1
7     a = Get next input
8     b = Get next input
9     result = 0 - b
10    result = result / a
11    Put result to output
12
13
14

```

Variables

1	a	int
6	b	int
4	count	int
-6.0	result	float

Input

2 5 7 28 1 6

Output

-2.5-4.0-6.0_

Code

Flowchart

```

1 integer a
2 integer b
3 integer count
4 float result
5
6 count = 0
7 while count < 3
8     a = Get next input
9     b = Get next input
10    result = 0 - b
11    result = result / a
12    Put result to output
13    count = count + 1
14
15
16

```

Variables

1	a	integer
6	b	integer
3	count	integer
-6.0	result	float

Input

2 5 7 28 1 6

Output

-2.5-4.0-6.0_
